

# HALLIBURTON AISES Powwow November, 2020

**LITTLE  
SHOP of  
PHYSICS**

COLLEGE OF  
NATURAL SCIENCES  
COLORADO STATE UNIVERSITY

Each year, the local chapter of AISES, the American Indian Science and Engineering Society, hosts a powwow on the Colorado State University campus. In recent years, they have asked the Little Shop of Physics team to set up a collection of hands-on science experiments for attendees to work with. Young people who take part in the powwow get a chance to unwind as they explore our experiment stations, aided by Little Shop interns and CSU students who are members of AISES, the hosting organization. It's a great mix of science and spectacle, and it is one of our favorite events of the year. Members of the team get a chance to experience some amazing dancing and drumming, and they get a chance to share some science with some remarkable young people. It is also a chance to recognize and celebrate the Little Shop's connection to and commitment to Native communities.

This year, over 100 Native K-12 students had a chance to take part, along with hundreds of members of the community who came to observe the events. This was a part of the day during which everyone present could participate, together. Everyone who participated received a pair of Halliburton-branded rainbow glasses, of course.

We are grateful to the Halliburton Foundation for the chance to develop the connections, the relationships, that make such events possible.
