

About the Little Shop of Physics

Founded in 1991, the Little Shop of Physics (LSOP) seeks to find creative ways to share the wonder of science with people of all ages, backgrounds, and interests. We present a unique hands-on science experience to a diverse range of Pre-K–12 students. LSOP involves undergraduate interns in significant and meaningful service. We also exchange ideas and insights with current and future teachers.

Support the Little Shop:

If you and yours have had fun today, consider donating to support our mission of making science accessible and fun for everyone. Scan the code below to donate:

Thank you
from the
LSOP Team!

Find Us on Social Media

Snap a #ScienceSelfie – perhaps in the infrared or with our giant chair illusion station – and post it to social media. Don't forget to tag the Little Shop of Physics! #LSOPSSE
